

Accessible Summer Research (ASSURE) Fellowship

June 2 – August 8, 2025

The Department of Anesthesiology's ASSURE Fellowship provides college students from the St. Louis metro area an opportunity to engage in basic, clinical, and/or translational research projects.

Undergraduate fellowship positions are available for this immersive 10-week program. The ASSURE Fellowship aims to attract, train, mentor, and provide long-term career support for local college students. We especially welcome applications from individuals from backgrounds that are historically underrepresented in science and medicine.

Fellows will work closely with faculty mentors, PhD students, and postdoctoral trainees at various stages in their academic career. Fellows will have opportunities to participate in research across the translational spectrum – from fundamental lab research to clinical research involving human patients. Additionally, fellows will have an opportunity to shadow clinicians, gaining firsthand insight into the daily work of physicians and CRNAs.

PROGRAM BENEFITS

- » \$7,000 stipend
- » University campus housing option available
- » Free public transportation pass
- » Professional development opportunities
- » Research with experienced faculty
- » Exposure to mentors and students at various stages in their academic careers

ELIGIBILITY

- » Candidates do not need to have prior research experience.
- » Undergraduate students attending a university or college (four-year institution or community college) local to the St. Louis metro area, including Southern Illinois, or students who are from the St. Louis metro area and attending school elsewhere.*
- » Interest in one of the research areas mentioned on the program website or a career in the health sciences.
- » U.S. citizen or permanent resident.
- » In good academic standing with a strong GPA.
- » Have a demonstrated commitment to equity in all settings.

* Recent graduates who obtained their degree within the last 6 months are also eligible to apply.
